📌 Note / Instructions

- For the best experience, please follow the project setup and execution instructions carefully.
- **Initial Data:** The database will be empty. You need to:
  - Create an **Admin account**.
  - Add a **Workspace**.
  - Inside the workspace, create a **Project**.
  - Add **Members** and **Tasks** inside the project.
- **User Accounts Requirement:**
  - To add a member to a project, you must first **create a user account**.
  - When adding members, only users who are **not already assigned to another project** will be visible in the selection list.
- If any issues occur during testing, kindly ensure all steps are properly followed before proceeding.
- For persistent problems or assistance, contact support on **Mobile: 8623988058**.

⏳ Loading Notice

- Please wait a few seconds while opening the website for the first time.
- Since the project is hosted on **Render**, the initial load may take some time as the server wakes up.
- After every click, allow a few seconds for the system to respond. Response times depend on **internet connectivity** and Render's server response.

💻 Recommended Usage

- Use the application on a **PC or laptop** for the best experience.
- The project is **not optimized for mobile view**.

⚠️ Additional Tips

- Always wait for pages or modals to load before interacting with the next element.
- Follow the hierarchy: **Admin → Workspace → Project → Members/Tasks**.
- Patience is required during first-time rendering, data creation, and member assignment.

Thank you for your understanding and cooperation.
